DECLARATION

I assert you that the information furnished above are all true to my knowledge.

DATE :

PLACE :

(AMBRISH DADHWAL)

- Weekly client interaction, issues escalation and resolution and status meeting.
- Provide enhancements in Existing code and add new Functionality in existing application and bug fixes.

FIS Global

Mohali

Designation: Senior Software Engineer I

October 2018 – still working

1) Project – Customer Support Tool (CST)

Module – Banking domain

Project duration – 6 months.

Overview:

CST is the main admin UI tool to manage the End Customers of the banks. It generally works in this fashion (**FIS → Banks → Bank Products + CST**). So FIS provides CST as an additional tool to manage the end users.

- a) Reporting sections of the users of a particular Bank or all banks.

Technologies & Tools:

Core Java, Collection, J2EE, Javascript, SQL, Oracle (Database), Websphere Server.

Primary Role:

- Code Development, new features implementation, features enhancement.
- Production Defects.

2) Project – Fusion

Module – Banking domain

Project duration – Currently Working.

Overview:

It's a startup project that provides all Banking operations in the single place building from the scratch. It generally works in this fashion (**FIS → Banks → Bank Products[Fusion]**). It has following modules. (ALL operations *POST, PUT, DELETE, GET*) and I have worked on these modules and currently implementing other operations by creating the backend Restfull API.

- a) **Payee Module** → Add a payee to existing end user
- b) **Payment Module** → Add payment to existing end user.
- c) **Bill Module** → Add a Bill to the user for any payment and so on.

Technologies & Tools:

SpringBoot, Java 1.8, Maven, JBoss, Oracle DB, UI (Angular)

Primary Role:

- Build Functionality from the scratch.
- Working as a Scrum.
